PROFILE:

Innovative and results-oriented technology leader with 15+ years of experience in R&D, product innovation, and scaling high-performance engineering teams. Proven expertise in cloud-based architecture, AI-powered solutions, automation, and mobile platforms. Adept at aligning technology strategy with business goals, leading cross-functional teams, and delivering impactful, scalable products.

WORK EXPERIENCE:

CTO / VP R&D – Constrol (2023 – Present)

Built the company's technology organization from the ground up, driving **2x revenue growth within one year** through scalable architectures and automation. Designed and implemented comprehensive BI, CRM, and SaaS platforms to enable real-time customer and activity tracking. and introduced **AI-driven solutions** to enhance operational efficiency. Spearheaded workflow automation using n8n, Zapier, and MCP-based systems, significantly streamlining business processes. Directed and mentored a cross-functional team of 18+ professionals, overseeing end-to-end development in Next.js, React, C#, Nestjs and Python. Specialized in AI, computer vision, and QA (manual and automated), ensuring innovation, scalability, and product excellence.

Head of R&D – PayBox (Bank Discount) (2019 – 2023)

Led 3 team leaders and **20+ engineers** delivering complex fintech solutions. Refactored a monolith into microservices and designed an event-driven architecture (pub/sub, orchestration) for the company's MVP. **Saved $3M+ annually** by optimizing payment processing through international schemes. Built mobile Tap-to-Pay and led Shufersal integration and architecture (cash-back, gift cards, Supreme-points). Managed cross-stack projects (Node.js, C#, Kotlin, Swift) with GCP (GKE) deployments and Jenkins CI/CD, collaborating with Product, Security (CISO), and Operations to meet business and compliance goals.

Head of Mobile – SpotOption / Dx.Exchange (2014 – 2019)

Led a cross-functional team of 12 (Android, iOS, QA) to design, develop, and scale B2B mobile solutions at a high-growth fintech startup. Defined mobile product strategy and architecture, introduced CI/CD automation, and remained hands-on with Android development. Under my leadership, the platform achieved **10M+ downloads** and powered **300+ white-label apps**, enabling global partners to deliver fully customizable, high-impact mobile experiences.

TECHNICAL SKILLS:

Programming Languages & Frameworks:

Kotlin, Java, Go, JavaScript, TypeScript, C, C++, C#, SQL, Dart (Flutter), React Native, React.js, AngularJS, Angular 13–15, Node.js, Nest.js, Next.js, Flutter, Unity

Technologies & Tools:

MongoDB, PostgreSQL, MySQL, Redis, Kafka, NoSQL Databases, Protobuf, Docker & Docker Compose, Jenkins, Git, Railway, Heroku, Northflank, Kibana, ElasticSearch (ELK Stack), Auth0, Figma, Cursor, Cloud Code, n8n, Zapier, V7 (AI/ML), OpenAI, LangChain, LangGraph, Autonomous Agents, Gemini

EDUCATION:

M.Sc. – Technology Management (IT Specialization), Holon Institute of Technology (2015 – 2017)
B.Sc. – Computer Science, Holon Institute of Technology (2009 – 2012)

KEY STRENGTHS:

Strategic Technology Leadership
Scalable Architecture Design (Microservices + Event-Driven Architecture)
AI/ML & Automation Implementation
Cross-Functional Team Management, Insourcing & Outsourcing Management
Agile / Kanban Project Delivery
Fintech & Contech and Mobile Platform Expertise
